Summer 2016 Online Math Summer Modules
July 5th to August 27th

Sponsored by the URI Math Department mathdept@math.uri.edu

Online math modules are available to help students prepare to retake the URI math placement exam.

- Enrollment in the Summer Online Math Modules is done during your advising session by your advisor (or you may contact the URI Math Department directly at mathdept@math.uri.edu).
- All modules will start on July 5th. Enrolled students will be contacted by the Math Department via your URI email address with further detailed instructions.
- Use your URI email address for ALL communications.
- The URI Sakai system, https://sakai.uri.edu/ will be used to administer the Summer Online Math Modules.
- The online modules have videos, examples, pre-quizzes, and quizzes that will help prepare students to retake the math placement exam.
- Students work at their own pace (there is a time limit on quizzes).
- You will be required to enroll in the module associated with the course you placed into during your proctored placement. Once you complete and successfully pass a module you may move on to the next module.
- Modules are content-specific and assume you have prerequisite knowledge.
- Students may re-take the URI Math Placement Exam for the second time in order to achieve a placement in a higher level course. All re-takes are administered during the two week period between August 29 to September 13.

Summer Math Modules

Module 1: AEP
Algebra Enhancement Project
MTH-099/MTH-100X
Introductory and Intermediate Algebra material to help prepare students for MTH-101 Intermediate Algebra placement.
